(A) destroy (B) destroying (C) destroys (D) destroyed

II. 閱讀理解 (40%): 選出最適當的選項

Although it has a modern and cosmopolitan capital, Iceland is characterized by some of the most dramatic landscapes to be found anywhere on Earth. It is also a dynamic landscape, a fact nowhere more in evidence than on the highly active volcanic Westman islands, six miles south of the main island. In the last 50 years, they have seen enormous changes. One, Surtsey, only appeared in 1963 following a volcanic eruption, and another, Vestmanaeyjar, was evacuated in 1973 after a devastating eruption.

Visitors are attracted to these extraordinary islands by the puffin population. These small black and white birds can be seen in their thousands perched on cliffs and steep grassy slopes. Lucky visitors can witness the ancient and traditional art of puffin catching or sky fishing. Using large nets on long poles, like butterfly nets, hunters stalk the puffins perilously close to the cliff's edge, and when they take flight, they catch them in their nets. Puffins can be caught in this way each day. It's dangerous work, but for the local hunters puffin meat is a staple food. I was **taken aback** by the flavor at first, but the meat was tasty.

(from National Geographic Learning Life series)

1. What is the meaning of "**taken aback**" on the last line of the article?
- (A) annoyed
(B) scared
(C) miserable
(D) surprised
2. What is a puffin?
- (A) a kind of bird
(B) a kind of insect
(C) a kind of animal
(D) a kind of fish
